PROFESSIONAL SUMMARY

MCA Cybersecurity graduate (Amrita Vishwa Vidyapeetham, 2025 | CGPA: 7.47) with hands-on expertise in SOC monitoring, SIEM-based threat detection, alert triage, incident response, log analysis, and web application penetration testing. Built real-world SOC dashboards detecting 5+ attack types including DoS, reconnaissance, exploit attempts, backdoor connections, and fuzzing attacks. IEEE-published researcher. Proficient in MITRE ATT&CK, OWASP Top 10, CVSS scoring, Wireshark packet analysis, and vulnerability assessment. Targeting SOC analyst, security analyst, cybersecurity analyst, and penetration tester roles.

TECHNICAL SKILLS

SOC & Detection: SIEM, Splunk, ELK Stack, Log Analysis, Alert Triage, Threat Detection, Incident Response, MITRE ATT&CK, Windows Event Logs, Threat Intelligence, and IOC Analysis

Penetration Testing: Web App Pentest, VAPT, SQL Injection, XSS, Security Misconfiguration, OWASP Top 10, CVSS Scoring, Burp Suite, Metasploit, SQLmap, Nessus, DVWA

Networking & OS: TCP/IP, DNS, HTTP/HTTPS, OSI Model, Packet Analysis, Wireshark, Nmap, Port Scanning, Network Enumeration, Linux (Kali/Ubuntu), Windows Server, and IAM

Programming & Tools: Python, Bash, Shell Scripting, SQL, Java, C#, Git, GitHub, Open3D, TensorFlow, Keras, Google Cloud, Azure Fundamentals

PROFESSIONAL EXPERIENCE

Junior Software Engineer (Trainee) — Stellaris Technologies Pvt Ltd | **Jan 2026 – May 2026**

- Completed C# and .NET backend development training; applied secure coding practices including input validation, parameterized queries, error handling, and role-based access controls (RBAC).
- Gained exposure to secure SDLC principles and version control with Git before transitioning to a focused cybersecurity career path aligned with MCA specialization.

PROJECTS

SOC Log Monitoring & Threat Detection System — Splunk, ELK Stack, Wireshark, Nmap, SIEM | **Nov 2025 – DEC 2025**

[SOC-Log-Monitoring](#)

- Built a real-time SOC monitoring dashboard—analyzed network alert logs, classified security events into CRITICAL/ALERT/INFO severity levels, and detected 5 attack types: DoS, reconnaissance scans, exploit attempts, backdoor connections, and fuzzing attacks.
- Executed full SOC investigation workflow: detected abnormal CRITICAL alert spikes, filtered by severity and protocol, performed Wireshark packet analysis, identified malicious behavior patterns, and produced structured incident reports with mitigation recommendations.

Web Application Penetration Testing — DVWA — Burp Suite, SQLmap, Nmap, OWASP Top 10, CVSS | **Mar 2026 - May 2026**

[web-app-penetration-testing-dvwa](#)

- Performed end-to-end security testing on DVWA—identified and exploited SQL Injection, Cross-Site Scripting (XSS), and security misconfigurations using Burp Suite, SQLmap, and manual testing techniques.
- Documented 5+ findings with CVSS severity ratings, detailed exploitation steps, and OWASP Top 10-aligned remediation recommendations simulating real-world penetration test reporting.

IEEE Research — Improved LiDAR Based Object Detection — Python, TensorFlow, Keras, Open3D, KITTI | **Aug 2024 – Aug 2025**

[Publication](#) | ICVTTS 2025, Christ University, Bengaluru

- Published and presented an IEEE research paper—implemented and benchmarked PV-RCNN++, PointPillars, and CenterPoint models on the KITTI dataset; improved 3D object detection accuracy in occlusion and sparse-point scenarios for autonomous driving applications.
- Developed real-time 3D visualization pipeline using Open3D and performed comprehensive performance benchmarking across all three deep learning models.

EDUCATION

MCA — Cybersecurity | Amrita Vishwa Vidyapeetham, Mysore

CGPA: 7.47 | 2023 – 2025

B.Sc — Computer Science | NIE First Grade College, Mysore

CGPA: 6.74 | 2019 – 2022

CERTIFICATIONS & PUBLICATIONS

- Tata Cybersecurity Security Analyst Job Simulation — Forage (Sep 2025) | IAM, Access Control, Identity Management, Security Strategy
- Introduction to Generative AI Studio — Google Cloud via Simplilearn (Oct 2025) | Credential ID: 9175025
- Software Engineering Job Simulation — Forage (Oct 2025) | Kafka, REST APIs, H2 Database, Secure SDLC
- TryHackMe — Active SOC & Penetration Testing Labs (Ongoing) | Threat Detection, Linux, Network Security
- IEEE Publication: "Improved LiDAR Based Object Detection in Challenging Scenarios" — ICVTTS 2025, Christ University, Bengaluru
